## SKILLS

Network Pentesting

API Pentesting

Web Application Security

Mobile Application Security

Vulnerability Assessment

DevSecOPS

Thick Client Pentesting

Cloud Configuration review

Source Code Review

Bash Scripting

Python

Container security

Kubernetes

go

## WORK EXPERIENCE

### Application Security Engineer

ArisGlobal

10/2020 - Present

*Achievements/Tasks*

- Responsible for pen-testing more than 20+ products which include Web applications, mobile applications, and APIs.
- Integrated various security testing tools in CI/CD pipeline. Implemented DevSecOps and performed daily builds for application security testing.
- Developing security-related policies, procedures and standards that meet existing and newly developed regulatory requirements.
- Identify vulnerabilities, recommend corrective measures, and ensure the adequacy of information security controls. Exploit the CVE related vulnerabilities.
- Conducting reviews on various other aspects of applications like Operating systems, Web Server, Database Server & Production Server Hardening, Configuration Review, Define, implementation, and maintaining corporate security policies.
- Proficient in identifying various core Mobile vulnerabilities like Deep linking exploit, Local file steal using LFI, Local SQL Injection, Abusing WebView XSS, and Bypassing application workflow by hooking class methods and functions using Frida and objection, Authentication bypass, Authorization Flaws and Business Logic Vulnerabilities etc.

### Core Pentester

Cobalt

11/2021 - Present

*Achievements/Tasks*

- Pentesting web and mobile applications as part of a pentesting project.
- Pentesting API security and internal and external networks are part of my responsibilities.
- Worked on cloud configuration reviews, Docker, and container reviews.

### Jr. Cyber Security Analyst

SecureLogic

12/2019 - 10/2020

*Achievements/Tasks*

- Worked on more than 10+ projects with different clients for Web and mobile Penetration Testing.
- Proficient in identifying various critical vulnerabilities like RCE, SQL Injection, XSS, Code Injection, CSRF, IDOR, Session Hijacking, Authentication & Authorisation Flaws, Remote & Local File Inclusion, Malicious File Upload, Business Logic Vulnerabilities and many more.
- Conducting review on various other aspects of applications like Operating System, Web Server, Database Server & Production Server Hardening, Configuration Review.

## WORK EXPERIENCE

### Independent Security Researcher

Yogosha, Bugcrowd, Detectify, Hackerone, Synack [↗](#)

02/2017 - Present

#### Achievements/Tasks

- More than 900+ bugs submitted across all platforms.
- Used XCode, Hopper, Passionfruit, Grapefruit etc, for iOS app testing to identify the classes and look for the weakness.
- Performed Web application vulnerability scanning and penetration testing tools such as AppScan, Netsparker, Qualys, WPScan, CMSScan, SQLMap, Nikto, ffuf and Dirb etc.
- Rank under 200 on bugcrowd platform with accuracy 99%.

## EDUCATION

### PG-Diploma in IT Infrastructure, Systems and Security

Centre for Development of Advanced Computing [↗](#)

08/2018 - 02/2019

#### Courses

- 2nd Rank holder of batch 2018-19

### BE-Computer science

Dr.D.Y.Patil school of engineering [↗](#)

06/2014 - 05/2018

## HONOR AWARDS

Top Performer Award (06/2021 - Present)

*ArisGlobal*

- For outstanding performance and lasting contribution.

Most valuable Professional (05/2021 - Present)

*Bugcrowd*

- MVP program recognises hackers that consistently bring their A-game across Bugcrowd bounty programs.

## ACHIEVEMENTS

Hall Of Fame

*Microsoft, At&T, US Dept Of Defense, Indeed, Toyota, Pinterest, Lenovo, HP, Ford, Dell, Magisto, Realself, Mastercard, National security Singapore, Drexel university, Skyscanner, magic leap, status page, sprout social, Telefónica Germany.*

Awarded By

*Line, Amazon, Github, Takeaway, Vimeo, zenly, indeed, magic leap, showmax, magisto, segment, cloudways, Statuspage, Spokeo, Xiaomi, Medipass, Platform 161, GenieBelt, Alef, Directly.*

## PERSONAL PROJECTS

Dextros (02/2019 - Present) [↗](#)

- Dextros is a password-cracking tool that works on a cluster environment with currently supported up to 10 nodes(1 master + 9 slaves). Dextros supports Dictionary as well as brute-force mechanisms to crack the password. It distributes the password cracking task among all connected nodes to reduce the time to crack the password.

Recce (06/2019 - Present) [↗](#)

- This tool probe for alive subdomains from either given file or a single URL This tool is fast and multi-purpose HTTP toolkit allow to run multiple probers using pyCurl library.

## CERTIFICATES

eLearnSecurity Certified Professional Penetration Tester(eCPPTv2) (02/2022 - Present) [↗](#)

Certified Ethical Hacker(CEH) (03/2017 - Present) [↗](#)

eLearnSecurity Web application Penetration Tester eXtreme(eWPTXv2) (04/2022 - Present) [↗](#)

OpenBugBounty (05/2019 - Present) [↗](#)
